Marcapasos (Dusted Decks)

If anyone knows the heartbeat of the floor than it is him because even after nearly 10 years in the music business Marcapasos has been proven to be a constant in the line ups of the clubs and festivals. His Spanish artist's name was not chosen without a reason. Marcapasos is the pace maker of any dance floor, the initial spark for the maintime, the time base for feet and hands. He transports the spirit of a seemingly true southerner to the dance floor and gives the evening a certain charm.

Rightly so the DJ, live act and producer who is known beyond the German borders is a crowd puller. As early as 2006 he mixed himself into the hearts, respectively ears of the MDR listeners and won the Sputnik Lounge Battle, and following that played the opener of the Sputnik Turntabledays, stood for the first time on the monstrous stage of the Nature One Festival in 2008 and shortly afterwards behind the decks at Sonne Mond Sterne und Sputnik Spring break. Since then nearly every club in Europe is being connected to the machines of Marcapasos.

After a couple of remixes his first own output „I know“ was the highflyer of 2009. The title Reputation made it to position one of the DJ-Tunes-Charts for a long time and found itself in the players of the DJ elite. In 2010 the dynamic impulsive Monster 2k10 EP together with fellow producer Janosh followed on Toka Beatz. A real axe which roars through the clubs to this day. With mighty credits of the DJ profession around the globe remixes for Boogie Pimps, Sun@Night and Roger Sanchez followed as well as fresh own compositions such as One Day, Music and the newest Blown Jop single together with the airy and light and highly official hymn for the Holi Festivals 2013.

Under the wings of the Dusted Decks cadre factory he has found a snugly homebase which gives the free spirit the time to fully concentrate on the music. The willing listener and dancer can expect more similar releases f.i. on Ultra Records and Kittball. Without a doubt always in the rhythm of the pace maker.
